Profile

During my career I have been designing motion graphics for some of the UK's most loved and diverse TV programmes. With an extensive experience of idea generation, branding, creative software (2D & 3D), post-production, live broadcast, design, print and online.

I have designed for hard hitting news programmes (*ITV News*), breakfast (*Daybreak*, *Good Morning Britain*), softer magazine style shows (*Lorraine*, *This Morning*, *Stephs Packed Lunch*), topical chat shows (*Loose Women*), glitzy primetime awards shows (*BBC Sports Personality of The Year*) and fast-paced youthful online sporting content (*BBC Sport*).

In 2021 I took on a full rebrand of BBC Sports football coverage, including *Match of the Day*, *Match of the Day 2* and the BBC's coverage of *Euro 2020* and the *FA Cup*. This project was done completely remotely.

The many rebrands and refreshes I have designed have allowed programmes to keep all designs (and its assets) in-house saving money and all whilst building the reputatuon of the department

I try to be inspired by as many things as possible; the beautiful, the mundane and the downright stupid!

Key Skills
